Our Services are In English, French and Haitian-Creole

Web Development & Design

Our Web Development & Design is a front end 21st century web development. *Everything STARTS with a website*, because your website is your online identity, we strive to make it remarkable and responsive.

How does it work?

1. You contact us with an explanation of your project.
2. We contact you back with a price estimate.
3. You pay $100 USD deposit fee prior to going further. (That deposit will be credited toward the total cost of the project.)
4. We get you a domain name.
5. We will email you a Memorandum of Understanding (MOU) to sign.
6. You will **READ** it, **SIGN** it, and email it back to us.
7. We start your project and give you an estimated time for completion.
8. Once completed, we send you a video preview of your entire project.
9. You ask questions and makes changes if needed.
10. You pay us.
11. We publish your project (or email you the files if you are not going to use our web hosting).

How do I make a payment?

All payments will be accepted via PayPal, which is the best and safest third-party online payment. After your first appointment with us, we will email you the bill for each step.

Do you charge per hour?

We have two billing options:

- Option-1 ○ $40 USD per hour starting at a minimum of 25 hours a month.
- Option-2 ○ $5 USD per new line-of-code and $3 USD for reused line-of-code.

What is the difference between new line-of-code and reused line-of-code?

New line-of-code is the code with which we started your website. This code can be reused within the same page, or a new page if those pages will have the same features. Because that code has already been created, it can be reused by copying and pasting.

What if I need a rush job?

We do our best to accommodate our customer's timelines. If a rush job is needed, extra fees may apply. Please contact us for details.

Web Hosting & Domain Name

After my website is ready, is there an additional fee to host it?

If your website is new and you do not have much traffic and data, you will pay $10 USD/month or $100 USD per year if you want us to host your website. That price may increase if your website has more traffic.

Is there a monthly or yearly fee to pay for my website?

No, after you pay for your entire project you DON'T have to pay any more fees for your website. (Unless you are hosting with us; see above.) However, if you need maintenance or wish to add new features, you will contact us and pay for that service.

Is there a price for my domain name?

No, but you have to pay the $100 deposit fee and we will pay the domain for you within that deposit fee.

If I decide to not complete the project, will I get my deposit fee back?

The deposit fee is nonrefundable. This is to ensure that we are able to provide you with the highest quality services when we begin your project.

Maintenance

We advise our customers to have maintenance on their website every year, even if that customer does not want to add any features. Technology is changing on a daily basis, and what is safe today might be harmful tomorrow. Website maintenance is a flat fee of $50 USD/year.

Logo & Business Cards

Logo designs and business card designs range from $30 USD to $100 USD, depending on the contents within the logo.

Email services

We provide you with one free professional email; e.g., *you@yourdomain.com.* If you want additional emails, there will be a fee for that, and it varies with how many MB you need.

Web Development Summary:

Prior to starting a website, think about:

1. A domain name
2. The project cost
3. A logo
4. Hosting
5. Emails & business cards (Optional)

Cyber Security

Why do I need a cyber-security service?

Cyber-criminals are getting more sophisticated than ever. Threats on the Internet and attack vectors are all over the place. The Internet is virtual and dangerous. You need to partner with cyber-security professionals who can find threats within your home or business before the bad guys do.

How can That Cyber Guy prove to me that they can protect my business and me against threats?

That Cyber Guy is monitoring, removing, and mitigating threats on a daily basis. We are certified CompTIA Security+, a certification granted by the top third-party certification company. We are cyber-security professionals and have also owned cybergeeknews.com for two years.

What cyber-security services do you provide?

We provide:

1. Threat analysis
2. Cyber-security training (In English, French or Haitian Creole)

Threat-analysis

- You got a suspicious email, or your computer is misbehaving after you accidently visited a malicious website. You contact us about that, and we analyze the threat and let you know if it is a false positive or not. We can also give you detailed information about where that email came from, the location, IP address, domain name, etc.
- We can also scan your server or your domain for open ports and let you know if you have unnecessary ports open that need to be closed.

Is an open port dangerous?

It depends. On a server you should open port 443 (HTTPS), otherwise people won't be able to access your server using https. Yet you should always close Telnet port 23 because it is not secure. Attackers can use it to remotely access your server. That Cyber Guy knows which ports should remain open and which ones should be closed.

How can you scan my server or domain? Will you come to my office?

We have tools for remote services, so we do not need to connect to your network or come to your office to scan your server for open ports. We can do it from anywhere.

How do you do your cyber-training? Will you travel to my place?

All cyber-training will be done remotely by video conference.

What is the price for the cyber-security services?

$30 USD/month or $300 USD/year provides you with all the services listed above, plus a monthly report and tips.

Our Antivirus-Protection

We are proud to say that we are partnering with one of the top anti-virus protectors in the world, **Avast Business Cloud Care**. Avast has been around since 1988. With more than 30 years on the market, Avast has proven that it deserves the place it is in now.

What is the price for antivirus protection?

Our price varies depending on whether you choose the Premium Plan or Ultimate Plan.

Premium Price $34.99 USD/year:

1. Web Shield (Protects against malicious websites and blocks potentially unwanted programs)
2. Mail Shield
3. Behavior Shield
4. Anti Spam (Scan your incoming emails and block spam) 5. Data Shredder

Ultimate $59.99 USD/year:

1. Web Shield (Protects against malicious websites and blocks potentially unwanted programs)
2. Mail Shield
3. Behavior Shield
4. Data Shredder
5. Secure Line VPN
6. Firewall (Optional)
7. Password Manager
8. Wi-Fi Inspector and much more **What is a VPN?**

A VPN is a Virtual Private Network. By using our VPN you will browse the Internet anonymously and securely on the insecure network called the Internet. You can also change your location from anywhere and anytime.

How will you install Avast for me, will you travel to my place?

No. After you pay for your license, we will send you an email with the installation key and steps to follow to successfully install your antivirus.

Summary:

Cyber-security is critical in the 21st century, and you are in the right place to take the next step with your home or business security. Together, WE WILL MAKE PRIVACY GREAT AGAIN!
